DIMITRIS MANTALIAS

# Highlights/Trailer

There is nothing more important than being able to relive those most precious moments of a life-changing day, in a way that is both meaningful and impressive, short in time but also containing everything of importance.

The highlights/trailer film may be the result of the cinematographer's subjective point of view but it is also the one video that contains the very essence of the things that were common to anyone who witnessed them. Love, emotion, passion, fun. Everything is masterfully fit in a film that is just a few minutes long but is destined to last for a lifetime.

A romantic scene from a wedding film. A man in a dark suit and a woman in a white wedding dress with a blue sash are embracing. The woman has her hand on the man's shoulder. They are outdoors at night, with a dark, textured background. The lighting is soft and focused on the couple.

# The Feature Film

The highlights film may be about having to express the important moments of your day in a short yet powerful package, but the feature film is the one that all the tiny and the huge details, the variety and quantity of emotions and the ability to build a cinematic momentum, finally meet in order to deliver the full story in a way that should force your fingers to be on the "repeat" button after the view is over.

With a duration of 20-40 minutes, the full feature ensures that every smile, every laughter, every tear of happiness, from the preparations to the Next Day Shooting, will not be missed and never be forgotten.

# The Extended Party

Nobody wants to miss a great wedding party. So why should one miss the chance reliving it in high quality again and again? The Extended Party cut is composed of lightly edited footage in order to give the power and energy of the absolute zenith of your wedding day. No cinematic approaches and artistic cuts here. Just the party fun, exactly the way you experienced it.

A professional motion picture camera, likely a RED or similar high-end model, is shown from a side-front perspective. The camera is black and features a large, complex lens assembly. A prominent red microphone is attached to the front of the camera. The camera is mounted on a rig with various adjustment knobs and handles. The background is a plain, light gray.

# The Presentation

Technology by itself is unable to produce art and beauty. Still, as cinephiles, it is our strong belief that moments of beauty like the ones of your special day, should be presented by equal technological image and audio clarity, being intimate, emotional but with the strongest wow factor possible as well. State of the art 4K cameras, lenses, drones, steadycam gear and professional audio recorders may be the absolute priorities for some, but for us they just complement the quality of the emotion they capture.
